

Aisuite3 server failed to run

Overview

If you're using an Nvidia GPU and installed driver version 591.44 yesterday, you've found the cause. Was this answer helpful?

Hi I'm Peter an independent advisor, theres quite a few reports. After updating Asus AI Suite (from version 2.10), it is impossible to start it. Nothing happens when I launch AI Suite and I get the following message when the PC starts up: The solutions I've found on the internet are not only dated, they don't work, at least for my version of AI. I'm getting an error "AISuite3. It looks like this: The computer chirps, which is annoying and gets in the way of listening. The only way I know of to make it quit is to reboot. Windows version is 23H2, OS Build 22631. Do I need to reinstall Windows, or something else?

I may. This is a friendly reminder to change your flair to Support - SOLVED! after your issue has been resolved. Thank you! I am a bot, and this action was performed. Keeps saying Aisuite3 Invalid Argument on windows start up and also when i try and run it from the start button, cant get it to run now. 04-01-2026 01:08 AM - edited 04-01-2026 01:09 AM Updated Armoury Crate now to the latest version 6.0 - AI Suite finally works again.
