

Can broadband be converted to fiber optic cable

Overview

Many network switches have expansion slots for optical transceivers (SFP's, GBIC's, SFP+'s). Alternatively you can convert a copper port into fibre by using a media converter. There are many options to suit the type of fibre, data rate, and environment they are to be used in. The transition from a traditional cable network to fiber optic may seem like a complicated process, but with the right tools, it is much simpler than it seems. It's easy to understand why people want to make the switch. Some people may still be. Switching to Fiber optic from cable, what do I need to know?

I'm considering switching from my cable internet provider to a Fiber optic instead. I've never researched or came into contact with fiber, so one of my first questions are : Do fiber optic connections use different modems than cable?

Are. Many people ask the same question: Can you use a fiber optic cable with an RJ45 port?

The short answer is no - RJ45 connectors are designed for electrical Ethernet signals, while fiber optics transmit light pulses through glass or plastic.
