

Checklist for Level 3 Distribution Box

Overview

Display and switches of panel should be in good condition and with proper cover on it. Provision of MCB/ELCB/RCCB for power connection. Ensure that all labels and warning signs are legible. Internal Inspection Open. Note: The instruments that will be used for testing and commissioning need to be examined to make sure that they have been calibrated, and the reports that verify that they have been calibrated should be saved as a record. Physical Check To confirm that the parts are connected properly and that. This pdf contains 77 electrical inspection checklists taken from the 2014 Electrical Inspection Manual with Checklists. Look for: Burn marks or discoloration (that ugly brown or black tint that screams "I overheated!") 2. Connection Tightening: The Power of the Right Grip Those vibrations you feel when a pump starts?

Over months.
