

Does the fiber optic switch come with a router

Overview

Yes, in most circumstances, the technician shall come along with a fiber router and place it as they connect your new fiber optic internet service. However, setting up a fiber optic connection to your router can seem daunting if you're unfamiliar with the process. Why Use Fiber Optic Internet?

Before diving into the setup, let's quickly. Instead of upgrading my router, I'm considering placing an unmanaged 10gb switch between my modem and router (switches seem to be a LOT cheaper than routers) to allow other wired devices to take advantage of the full 10Gbps speed while still using my router for WiFi and DHCP. There are several lights on the ONT, when these lights change colour or flash, it means something is happening. It connects directly to the optical line terminal (OLT) at the central office and serves as the endpoint for fiber-optic signals in the user's premises. If you already have a router, you might wonder, "Do I need a modem if I have a router?"

"The answer depends on your internet connection type. If you have a traditional DSL or.
