

Door-to-door high-speed optoelectronic connection QSFP-DD

Overview

Amphenol's QSFP-DD high-speed connector family features a scalable, high-performance interconnect platform with 76 contacts on a 0.8mm pitch and a dual-mating interface. This QSFP-DD (Quad Small Form Factor Pluggable Double Density) is an evolution of the QSFP family, extending its lane capacity from 4 to 8 high-speed electrical lanes. Each lane supports up to 50G PAM4 signaling, delivering an aggregate throughput of 400G — or even 800G in advanced PAM4 implementations. QSFP-DD connector portfolio's backwards compatibility allows. Network operators are looking for cost-optimized optical solutions that provide increased density and reduced power consumption—across high-speed as well as legacy ports—without sacrificing network performance or reliability. © 2023 Cisco and/or its affiliates. Quad Small. The 400G QSFP-DD DWDM OPEN ZR+ Coherent transceiver will enable IP-over-DWDM deployments in metro and regional optical transport networks.
