

Fiber FC-FC is round to round

Overview

It is a round threaded connector that is applied in datacom, telecommunications, measurement equipment, and single-mode lasers. 5 mm ferrule surrounding a stainless-steel housing. The fiber end is embedded in a 2. The tip is then typically polished to produce a rounded surface, called "physical contact" polish. This surface profile means that when the fibers are mated they touch only at their cores, allowing. Normally used to connect two fiber optic cables with standard FC (male) connectors. A fiber optic connector is a mechanical device that allows two fibers to be joined precisely, enabling light to pass with minimal insertion loss and reflection. FC connectors. The FC connector or ferrule connector is synthesized for singlemode fiber optic optics and has become very popular because of its reliability.
