

Fiber Optic Cable Installation Standard GB

Overview

This 3-part British Standard specifies the basic requirements for planning, implementation and operation of information technology cabling using balanced copper and fibre optic cabling. This standard is concerned with installing and commissioning of optical fibre cables for Telecoms transmission as per route plans, and testing the effectiveness of joints. The standard is applicable to cabling designed to support particular analogue and digital telecommunication. Recommendations for Fiber Optic Cable Installation Where reels are supplied with protective material fitted over the cable, the protection should remain in place until the cable will be installed. During installation, all curvatures should be smooth. The table below details the documents which form the two.
