

Fiber Optic Cable Joint Box Type Fiber Distribution Box

Overview

A fiber distribution box (FDB) is a passive enclosure that provides secure splicing, termination, and distribution of optical fibers. Fiber distribution box is suitable for the wiring connection of optical cable and optical communication equipment, through the adapter in the wiring box, the optical jumper leads the optical signal, and realizes the optical wiring function. OTRANS strives to provide you with professional, reliable. Fiber Optic Splice Closure Applications Fiber Point Distribution, FTTx Features and Benefits Maintains bend radius for G. Fiber splice enclosure box is used for. Riteoptic fiber optic cable joint box provides optical, sealing and mechanical strength of the continuity between adjacent fiber optic cable connection protection device. According to the structure can be classified into the dome (vertical) and horizontal (half) two kinds of cable splice closure.
