

German railway industry switch manufacturer

Overview

Schaltbau products are found in rail vehicles all over the world, ensuring safety and comfort for passengers and goods under tough railway operating conditions: they switch, connect and control electrical systems, and meet all requirements for quality, reliability and service life. For almost seven decades, we have been manufacturing products and components for railway applications, both for the train and along the tracks. The core competence can be succinctly described with the words "connect, contact, control. With a broad portfolio of contactors, connectors, switches, and safety components, Schaltbau helps partners and customers solve today's challenges in rail, energy, and. We are a globally operating company and one of the leading suppliers of low- and medium-voltage switchgear and switching devices from 0.5 kV/52 kV - "Made in Germany".
