

Ghana Fiber Optic Distribution Box 6 Cores

Overview

The HTB8004 6-Port Fiber Optic Distribution Box is a reliable and space-saving solution for fiber termination and distribution in FTTH and telecom networks. Designed with a strong ABS housing, it protects fibers from environmental impact while ensuring organized cable routing. Where copper cabling uses electricity to transmit signals from one end to another, fiber optics use light pulses to accomplish the same purpose. The fiber optic cable is made of a transparent glass core surrounded by a mirror like covering called cladding. Light passes through the fiber optic.
