

HVJBC-3 Relay Protection Tester

Overview

This portable relay protection tester is designed for comprehensive testing and calibration of various protection relays. The instrument simulates fault conditions and analyzes relay performance, ensuring the reliability and accuracy of protection systems. The instrument uses single-chip microprocessor technology over the same period by the number of milliseconds the table automatically, logic control unit, multi-function digital display. HVJB-III Single Phase Relay Tester - Relay Tester - Relay Tester, CT PT Analyzer, Secondary Circuit Tester - PRODUCT - HD YOGA MANUFACTURING CO. Newly developed Calibration device. The main function of the tester is the calibration of voltage and current operation relays, secondary circuit inspection, trip value of circuit breaker test, switch on and off time. JBC-III Relay Protection tester is newly developed high intelligent, multi-function relay calibration equipment. DC voltage output:0~350V continuous adjustable, output capacity:960VA 2.
