

How much does ADSS fiber optic cable cost

Overview

A 12-core ADSS cable for short spans (≤ 100 meters) might cost around \$0.35 per meter, using a standard double PE jacket and basic aramid strength members. The price of ADSS (All-Dielectric Self-Supporting) fiber optic cable can vary significantly depending on the design specifications, installation environment, and span length. For example below three cable structure □ ASU fiber optic cable single jacket adss fiber optic cable double sheath adss fiber. ADSS cable prices are determined by several factors, primarily the types of cables. These cables are installed as overhead wires, do not require a support system, and can carry a lot of extra wires. Sheath Type - Consequently, the price of an anti-tracking sheath (typically referred to as AT) is higher than that of a standard PE one. Material Costs: The type of materials used in the construction. Fiber Optic Cable 258 Original Std ADSS Flex-Span ADSS New Std ADSS Applications • Electric utility transmission lines - Typically framed under conductors • EHV environments - Tracking-resistant options available Features • Up to 432 fibers in cable - Gel-Free Buffer Tube options available - up to. ADSS cable is a type of fiber optic cable that is strong enough to support itself between structures without containing conductive metal elements.
