

# How to locate a large distribution box

## Overview

Look for the distribution box near the septic tank, at the edge of the drain field, or along the outlet pipe from the tank. Check for access lids or covers in the ground, usually small, square or round, and buried 6 inches to 2 feet deep. The tank is almost always downstream from the main sewer line exiting the house, typically 10 to 25 feet away from the foundation. They're usually made of either plastic or concrete, and they have several openings on different sides where the drain field lines connect to the box. In this guide, we'll explain how to locate your distribution. This septic system inspection article explains where to look for and how to locate septic system components for any purpose such as inspection, maintenance, troubleshooting or repair, or as part of the Septic Loading and Dye Test procedure for testing the function of septic systems. Maintaining a septic system is crucial for.
