

# How to make control cable trays

## Overview

Building a custom cable tray is a great way to keep your space organized. First, gather sturdy materials like metal or plastic, along with tools like a saw and drill. Measure your area to determine the tray size, then assemble it by connecting side and end panels securely. However, I find that cable ties bind when you want to remove, replace or add a cable—and, apart from expensive trunking, the other cable-tidy gadgets I've seen look just as cumbersome or fiddly to use. This article offers a straightforward, step-by-step method for creating one. Personalize with paint. Learn the essential process of making cable trays—those metal channels that organize and protect electrical wiring! This short shows key steps: cutting sheet metal to size, punching or slotting for wire access, bending edges to form the tray shape, welding joints for strength, and smoothi. The process described here takes a systematic approach to ensuring that cable tray installations meet safety, reliability, and project-specific needs while following to.
