fCONSTRUCTION QUALITY REQUIREMENTS FOR FTTP & SSP Work Orders This document provides Construction Technicians, Construction Managers, FTTP/SSP Vendors, and Inspectors with the essential information to ensure a quality build and to successfully pass an Outside Plant Inspection. With this app. For outside plant work, fusion splicing is almost always the right choice. Mechanical splices are faster for emergency restoration but have higher typical loss (0. 1dB for fusion) and degrade over time in outdoor environments. At Turn-Key. In this comprehensive guide, we detail advanced splicing techniques, explain how data analytics and Business Intelligence drive operational improvements, and explore how field engineers can leverage insights to optimize network performance.
