

How to remove armored fiber optic patch cords

Overview

Use an armored cable cutter to remove the outer jacket. Score the armor gently, then bend it until it separates. Strip the inner cladding and buffer using a fiber. This guide provides a complete installation process for armored fiber optic cords, explaining each step from routing and pulling to stripping, cleaning, and testing. It also highlights key differences from standard fiber cables and important precautions to ensure safety and performance. Fiber Optic Tools and Materials Needed: :: END-ACCESS PROCEDURE This procedure is intended to be used with central loose. 1. 1 This procedure describes general sheath removal methods for armored and non-armored versions of Corning Cable Systems FREEDM cables. 2 FREEDM cable is a rugged fiber optic cable featuring buffer tubes and a dielectric central member protected by a UV-resistant sheath, water-blocking tape. In your fiber optic cable assembly process, good stripping procedures are unquestionably essential. 3 Two versions of the cable are.
