

Huawei Optical Switch Configuration

Overview

In this video, we'll guide you through the process of configuring a Huawei Switch for your network. Whether you're setting up a new switch or optimizing your existing network infrastructure, this step-by-step tutorial will help you get the job done efficiently. The interface split function allows a high-bandwidth physical interface on the device to be configured as multiple independent low-bandwidth interfaces.

Solution: To solve this problem, you can follow these steps: Check if the fiber and optical modules are compatible. This repository serves as a technical knowledge hub for network engineers working with FTTH (GPON/EPON) infrastructure. Step 2: Power on all devices to perform a self-check. For example: Replace USERNAME with the new username, set the password, define service-type (telnet, ssh, etc).
