

New Materials for Distribution Boxes

Overview

Emerging materials expected to transform box storage in 2024 include biodegradable composites, advanced polymers, and smart materials that can change their properties in response to external stimuli. Steel and aluminum are the most common metals for distribution boxes. It is best for places that need extra protection, like factories or outside. Metal boxes also provide a degree of fire resistance, though the inner lining often includes flame-resistant coatings to prevent sparks from spreading. What Is the Packaging Box and its Role?
