

New Zealand Tower Communications

Overview

Kordia operates New Zealand's largest network of transmission towers, providing resilient broadcast, FM radio, and critical communications across the country. Wavecom has supplied towers for a range of projects in New Zealand and overseas, starting in 2007 providing 65 medium and high-capacity lattice towers to Vodafone Fiji, then with Phase 1 of the RBI project providing over two-thirds of the newly installed towers, to now recently supplying 40. Connexa is a specialist mobile tower infrastructure company, proud to design, build and manage the country's most extensive mobile site network. Wharite tower in the Manawatu also commenced build in 1965. Built as part of a national effort led by. At CSE Crosscom, we offer a versatile range of tower options to meet specific communication needs. Our towers support. Spark New Zealand, One NZ, and 2degrees provide most cellular network services, while a number of smaller mobile virtual network operators also exist. The first telegraph opened in New Zealand between the port of Lyttelton and Christchurch on 16 June 1862.
