

One-in-one-out fiber distribution box series distribution box

Overview

This optical fiber distribution box integrates essential functions—splicing, splitting, storage, distribution, and routing—into one wall-mountable unit. Its modular, user-friendly design simplifies network expansion while delivering superior durability and long-term reliability. Fiber distribution box is suitable for the wiring connection of optical cable and optical communication equipment, through the adapter in the wiring box, the optical jumper leads the optical signal, and realizes the optical wiring function. High quality components ensure a secure and stable operation. You can find fiber splice boxes and. Check each product page for other buying options. All are RoHS, and REACH. FDB-16C Series 16 ports Fiber Distribution Box, also called Splitter Distribution Box or Fiber Terminal Box, can be used in FTTH projects and is suitable for corridor, basement, room, and building's outer walls application. With the function of the mechanical splice, fusion splice, light splitting.
