

Opgw optical fiber splice package

Overview

This is designed for splicing ADSS, OPGW cables and the normal cables to house the fiber core splices to outdoor intermediate optical cable leading to the patch panel in the control room. It includes 2 - 4 sleeves for input and output. The fibres are loosely buffered in a tube containing an oval, spiralling, hollow channel filled with jelly. Application ranges from aerial, uct to buried. The procedure for preparing OPGW cables for fusion splicing consists of several steps. Different types of optical closures are used. After that, the cable is secured with a clamp or another suitable tool to ensure stability while removing the. Fiberon Metal Splice Closure is used to connect the distribution cable and the incoming cable is widely applied in communication, network systems, CATV cable TV and so on. It adopts scientifically formulated engineering plastic and be shaped by injection molding, anti-aging, anti-corrosion, flame. AFL Global's Apex OPGW Connector Kits provide reliable and efficient connections for optical ground wire cables. The closure is suitable for use above ground; it can be attached to high voltage towers, poles, walls or other support.
