

Power Distribution Box Panel

Overview

A power distribution box is a key part of any electrical system—it's the place where electricity from a main source gets divided and sent out to different circuits. You might also hear it called a PDU (Power Distribution Unit), distro, or distribution panel depending on the setup. A distribution board (also known as panelboard, circuit breaker panel, breaker panel, circuit breaker, electric panel, fuse box or DB box) is a component of an electricity supply system that divides an electrical power feed into subsidiary circuits while providing a protective fuse or circuit. Indication Lights: These provide visual availability and status of mains power supply. Each component plays a specific role. Together, they make sure the electrical power distribution box works well and safely.
