

Power cable trays above the office

Overview

Cable tray systems are the perfect solution for running large quantities of power or data cables overhead or under-floor. Also known as baskets, trunking, or cable ladders, these systems are designed to both route and provide support for vital wiring. Think of it as a organised highway for your cables. It keeps them off the floor, prevents tangles, and protects them from damage. Using a ceiling cable. These trays not only provide a durable and reliable means of cable management but also promote optimal airflow and reduce the risk of overheating, which is crucial for maintaining the integrity of the systems housed above the ceiling. The Steelcase Universal Cable Management Kit makes neat work. Explore various cable tray types and sizes for electrical installations.
