

# Power grid charging pile distribution box

## Overview

The charging pile grid-connected box is a key piece of equipment in electric vehicle charging facilities, used to safely and efficiently distribute grid power to charging piles while also providing protection, monitoring, and metering functions. The distribution cabinet in a shopping mall is a key facility in the power supply system, mainly used for receiving, distributing, and controlling electrical energy. AC or DC power is output through the power conversion module of EV chargers, including AC and DC EV chargers (integrated and split). 17, Nahan Road, Jiangnan District, Nanning City. Its core innovation lies in the integration of an electrical fire-proof current-limiting protector, which solves industry pain points such as delayed. With over a decade of sustained growth, Ningbo Henghui Electric Co. has established itself as a dedicated manufacturer and solution provider in the power industry.
