

Preventing tripping on cable tray floors

Overview

To properly prevent trip hazards from cables: Problem: loose cable across floor. Result: reduced injury risk and safer movement through the space. Whether in offices, schools, warehouses, events or construction sites, exposed wires create three major risks: The issue is rarely the cable itself. Wires running across footpaths increase the risk of trips and falls, while tangled masses near devices cause clutter. Managing these lines enhances home safety and organization. Use cable sleeves to bundle wires and secure them with clips along walls or under desks. We'll look into the purpose and structure of these mats, providing information on choosing the right type, their installation, benefits, and. Do you ever find yourself tripping over loose cables on the floor?

Have you ever had to relocate furniture just so you can have access to the plugs behind it?

If this sounds like a familiar problem, don't worry – it is! Fortunately, there are plenty of solutions when it comes to keeping cords.
