

# Remote power cut-off from intelligent distribution box

## Overview

Securely control power on/off/reboot to a server, router, web cam, firewall or other remote devices over IP. Also known as: secure remote reboot CAT5, Web remote power, intelligent power distribution management, secure PDU, power over ip, control. Intelligent power distribution box is composed of traditional leakage protector, air switch, AC contactor and KC868-H8. Compared with the traditional power distribution box, it is safer to cut off the strong power supply remotely, and it can save energy through the timing mode while controlling the. Remote distribution box monitoring By leveraging the intelligent remote monitoring function, you can collect the electric meter readings and implement networked transmission and control the safety energy. Through the new generation of Internet of Things communication technology, the cloud integration of data such as voltage. Switched PDUs revolutionize power management with remote outlet control, real-time monitoring, and automation capabilities - enabling instant reboots, energy optimization, and predictive maintenance. Access, monitor, and manage power from anywhere, ensuring efficient and reliable operation of critical systems. iPower ACU is a 3rd generation of intelligent PDUs design to aid Data Centre power management. The range consists of four models offering various levels of power monitoring and power switching features, and can be manufactured as single, dual or 3-Phase with a choice of socket types and mains lead.
