

Rwanda Fiber Optic Communication Network Project

Overview

Established in 2008, Broadband System Corporation Ltd. was mandated with rolling out a nationwide fiber optic network. The successful journey of the deployment of the fiber optic network has covered over 3000 Kilometers in 30 districts advancing Rwanda's mission of becoming. Kopa Telecom was created through the merger of Popconn (founded in 2014) and Truconnect (founded in 2015). Our network runs on Rwanda's largest fibre. Our fiber network will connect 30 districts with high-speed internet, enabling digital services and attracting international tech companies. Create a free account and start investing in minutes. We are a tech company established in 2010, providing world-class broadband connectivity and solutions to empower citizens, communities, governments, and businesses in Rwanda and the region. Connected: Government buildings/offices, universities, hospitals, schools, etc. Rich Applications: Data, Voice & Video (Education, Health, Agriculture, Safety & Security, Commerce, Transport, Energy, etc. Using low, mid-range, and high frequency bands, 5G can provide speeds of 100 Mbps in.
