

Seal off the end of the cable tray

Overview

The Cable Tray Rubber End Cap is used to protect the engine wiring harness within the cable tray. It seals off the openings of the cable tray, preventing the ingress of dust, water, and other contaminants that could potentially damage the wiring and electrical components. Just peel off layers until the module fits. The built in spare capacity makes it easy to open up the seal and change. 3M electrical end caps seal cable ends, providing reliable protection from environmental damage Which End Cap should I choose?

Provides quicker and easier installation by unwinding the removable core. For example, if cables have to be routed through small round holes, snap in cable grommets help. SLIPSIL Sealing Plugs are an ideal solution for the fire-safe, gas and / or watertight sealing of penetrations carrying single or multiple pipes.
