

Singapore HDB Housing and Development Board electrical distribution box

Overview

In Singapore, a standard distribution box is installed in every HDB flat. There is a main switch rated at 40 amps, as well. For residents of Housing and Development Board (HDB) flats in Singapore, understanding the electrical box outside your flat is crucial for ensuring safety and efficient electricity supply. These boxes, also known as electrical distribution boards, house important components that regulate the flow. More commonly referred to as DB box (distribution board box), breaker box, or power box, the distribution box is a major electrical wiring component in any home or commercial space. Every wire powering your lights, sockets, and appliances runs through it. Generally, power enters through the Main Circuit Breaker (MCB), located beside the electricity meter outside our HDB flat. This guide covers safety regulations and when to engage licensed electricians, specifically for HDB, condominium, and landed properties in.
