

South Korea Optical Cable Project

Overview

The JAKO project is a submarine optical fiber cable initiative connecting Fukuoka, Japan, and Busan, South Korea. The JAKO consortium comprises Microsoft (MS), Amazon Web Services (AWS), Korean operator Dreamline, and Japanese operator Arteria Networks, partnered. The South Korea optical interconnect cable assemblies market is currently valued at approximately USD 1.2 billion, reflecting its vital role in supporting the country's advanced digital infrastructure. Driven by rapid technological adoption and expanding industrial sectors, the market is poised for growth. LS Cable & System and its undersea communication cable subsidiary said Wednesday that they will take part in a large-scale telecommunications infrastructure project led by a global consortium including Microsoft and Amazon Web Services (AWS). Microsoft, AWS, Korean information and communication. including the 2018 Africa Coast to Europe (ACE) cable blackout that affected West Africa¹ and a series of suspected attacks in 2024 involving Taiwan, Saudi Arabia, and parts of Europe²—have exposed the extent to which global connectivity hinges on the integrity of undersea cables and their. South Korean telecom operator KT has announced that it plans to build a new submarine fiber optic cable to meet the growing demand for cloud services, big data. ASABA, NIGERIA, February 3, 2024 / EINPresswire.
