

Standard 24-core fiber optic cable junction box

Overview

24 Core Fiber Optic Termination/Distribution Box model SP-1606-24A is used as a termination point for the feeder cable to connect with drop cable in FTTx communication network system. A 24 core fiber optic junction box is a critical component in modern communication infrastructure, designed to manage, protect, and organize up to 24 individual fiber optic cables. These enclosures are widely used in telecommunications, data networks, construction projects, and even delayed power. GJS-24-D (PLC) 24 Cores SC fiber optic joint closure is a kind of small junction box that is used to join the fiber bundles and protect them during cabling installation, preventing the cables from abrasion and other damage. It is designed to protect fiber optic cables from the elements and provide a secure location for splicing and terminating cables.
