

Tanzania Fiber Optic Cable Laying

Overview

The project will lay a submarine fiber-optic cable across Lake Tanganyika, linking Kigoma in Tanzania and Kalemie in the DRC over roughly 160-186 kilometers. Fiber optic communication is revolutionizing the communications industry. Our services cover structured cabling systems and fiber optic solutions, ensuring your IT backbone is strong. Our fiber optic project follow the professional steps to ensure quality of work to our customers This involves construction, cabling and splicing It all begins with the need for communications services. While submarine communications cables are used to connect countries and continents to the Internet, terrestrial fibre optic cables are used to extend this connectivity to landlocked countries or to urban centers within a country. Kibogate provides telecommunication infrastructure services to support the growing demand for reliable connectivity.
