

Telecommunications Equipment Distribution Box

Overview

A telecom enclosure is a physical rack or cabinet that houses networking and communication equipment—such as routers, switches, patch panels, and modems. These enclosures organize your gear, route cables, manage airflow, and protect your investment from dust, tampering, and. With over 20 million enclosures deployed and more than 50 years of innovation, Charles is the communications industry's go-to source for enclosed solutions. Combining a consultative approach and engaged support, we guide you through protecting your critical network infrastructure. This cabinet offers 32x Optical Distribution Frames (ODF) and 10x 1:32 Splitters, ensuring efficient network distribution. We also offer bespoke products. Telecommunications enclosures are used in a wide variety of industries to safeguard sensitive equipment such as routers, switches, fiber OLT's, A/V distribution hardware, power supplies, and various other pieces of gear used to transmit data, audio, video, and electricity.
