

The switch does not have permission to access the network

Overview

We will be undertaking the following fixes to try and get rid of this error: Reboot your router. Check the Network configuration. msc in the Start search box and hit Enter to open the Windows Services Manager. When attempting to access a shared network resource, the error " You might not have permission to use this network resource " indicates that access is blocked, often due to permission or network configuration issues. (double slash does not show above?)

!) I tried all solutions I could find, but the. But when I click on the data raid d folder, instead of seeing all of its many subfolders, I get this message: "Windows cannot access Studio10data raid d - You do not have permission to access Studio10data raid d. " I can access the other. Information to help you when attempting to connect to an access point that requires authentication and the message "Registration is Required to Use This Network" is displayed on Nintendo Switch 2 or Nintendo Switch.
