

Trough-type cable tray with back plate

Overview

New from MonoSystems, this versatile cable tray system is available in a broad range of NEMA and CSA load classes. Trough Tray provides overhead protection and concealment for a wide variety of wire cabling installations. Selecting a specific width will show cable trays with that width, as well as cable tray accessories compatible with that width. Selecting a specific height will. Cable tray (or cable ladder) systems are a popular alternative to electrical conduit systems, as they have an outstanding record for dependable service, design flexibility and cost savings in commercial and industrial applications. Our solid bottom trough tray is used to carry smaller instrumentation, data communications, computer, telephone, control and fiber optic cable from one location to another.
