

What are the people who install optical cables in an optical cable factory called

Overview

Fiber Optics Technicians are responsible for installing, testing, and repairing fiber optic cables and systems. Each has unique requirements and requires different educational backgrounds. They often work for telecommunications companies, but they may also find employment with cable installation companies and other businesses that require high-speed, high-capacity data. A fiber optics technician — also called a cable technician, cable installer or telecommunications technician — designs, installs, operates, maintains and repairs telecommunication networks for high-speed internet, television and telephone services. This. At the heart of this explosive growth is fiber optic cable, the miracle technology that connects one network to another, more quickly and more securely (and over greater distances) than copper or steel.
