

What router should I buy for a 30 Mbps fiber optic connection

Overview

Our top overall pick is the Netgear Nighthawk RS700S, a Wi-Fi 7 router built for multi-gig fiber plans that handles up to 200 devices across 3,500 square feet. For budget-conscious households, the TP-Link Archer AX55 delivers reliable Wi-Fi 6 performance without the premium price. A fiber-optic connection is the best choice for fast home internet as it has a number of advantages compared to traditional copper cables, such as faster speeds and less interference. Many major ISPs, such as Verizon and Xfinity, offer fiber connections directly to your door, known as FttP or Fiber. Are you in search of the perfect router for your optical fiber internet connection?

Look no further! In this guide, we'll explore the top options available on the market to ensure you experience blazing-fast speeds and seamless connectivity. Whether you're streaming, gaming, or working from home. However, you need a router capable of supporting multi-gig speeds to get fiber internet connectivity. The bottleneck in your home network isn't the fiber drop — it's the LAN ports and Wi-Fi generation on the box sitting in your closet.
