

Which button do I press to restart the optical module

Overview

Press and Hold: Use a pointed object (like a paperclip or pen tip) to press and hold the reset button for about 10-30 seconds. Watch for indicator lights to flash or listen for a reset tone, which signals the reset process has started. **Release and Wait:** Release the button. To Reset a VSOL OLT, follow these simple steps **Locate the Reset Button:** Inspect the OLT device for a small button or pinhole labeled "Reset. **Plug in the power cord:** To restart your ONT, there is a black on/off button, located directly beside the black power cord and on the same side as all the other wired connections. Press the button to turn off, wait 10 seconds then press the button again to turn it back on. It may be. If you experience problems with your internet connection or connecting the Polestar app to the vehicle, it may help to restart the vehicle's communication module (TCAM).
