

Which router is recommended for armored fiber optic internet

Overview

The best router for fiber optic internet is generally a Wi-Fi 6 or Wi-Fi 6E router that supports gigabit speeds and offers robust features like QoS, MU-MIMO, and security protocols to fully utilize your fiber connection's potential. A fiber-optic connection is the best choice for fast home internet as it has a number of advantages compared to traditional copper cables, such as faster speeds and less interference. Many major ISPs, such as Verizon and Xfinity, offer fiber connections directly to your door, known as FttP or Fiber. However, you need a router capable of supporting multi-gig speeds to get fiber internet connectivity. However, the market is flooded with countless options, making the selection quite overwhelming. Our top overall pick is the Netgear Nighthawk RS700S, a Wi-Fi 7 router built for multi-gig fiber plans that handles up to 200 devices across 3,500 square feet.
